

Khanin Chomphusri

Senior Mobile Engineer | Cross-Platform Architecture

Results-driven Senior Mobile Engineer with a proven track record of architecting and scaling mobile modules for enterprise applications serving 10M+ concurrent users. Deeply experienced in component-driven UI development, reactive state management, and performance optimization across both Flutter and TypeScript/Angular ecosystems. Adept at translating high-stakes business requirements into secure, high-performance applications. Passionate about AI capabilities in agentic AI applications and AI-assisted workflows.

 khanin.chom@gmail.com  0897751919  Bangkok, Thailand  github.com/khanin-devmode

TECHNICAL SKILLS

Mobile & Frontend: TypeScript, Angular, Flutter, Dart, Tailwind, HTML/CSS.

Architecture & Tools: Reactive State Management (Bloc/Provider/Riverpod), Redux, Widgetbook(Storybook equivalent)

Optimization & AI: AI embedding, Performance Profiling, Automated QA Testing, AI Tooling & Context Engineering.

WORK EXPERIENCE

Software Development Engineer (Mobile UI Architecture Lead)

Oivan Digital (Thailand) - serving MimoTech AIS

07/2023 - Present

Bangkok, Thailand

Oivan is a Finnish company. AIS is a leading telecommunication company in Thailand.

- Architected and scaled critical UI mobile modules for the myAIS enterprise application, ensuring high availability and seamless execution for a massive user base exceeding 10 million.
- Spearheaded UI performance optimization, successfully reducing UI component rendering payloads by 40% (from 1,000 to 600 lines) and executing critical package refactoring to improve app responsiveness.
- Established a component-driven engineering culture by implementing an interactive UI documentation system (50+ components, 150+ use cases), acting as the central source of truth for Product, Design, and QA teams.
- Mentored cross-functional development teams on mobile architecture best practices, enforcing strict code quality and maintaining 90%+ test coverage across all owned packages.
- Engineered custom workflow solutions using AI-assisted tools to automate QA test key generation, accelerating debugging and team delivery speed.

Mobile Developer (Ionic & TypeScript) - Freelance

Tech Lead Innovation - serving Krungthai Bank

03/2017 - 02/2018

Bangkok, Thailand

- Engineered a secure, mobile-first banking application utilizing a hybrid architecture (Ionic and TypeScript) to ensure cross-platform consistency.
- Implemented critical, high-stakes financial user flows, including fund redemption and subscriptions, strictly prioritizing transaction security and state management stability.

Research and Development Manager

Sathien Plastic & Fiber group

08/2012 - 06/2023

Bangkok, Thailand

Automotive parts Manufacturer

- Managed the successful launch of 15+ new product lines over a decade, overseeing the entire process from initial design to final production to ensure consistent, on-time delivery.
- Oversaw product cost structures and pricing logic, carefully analyzing material and manufacturing workflows to ensure every launched product maintained a sustainable profit margin.
- Monitored and optimized daily production workflows, stepping in to solve quality control issues and issuing practical engineering adjustments to keep manufacturing running efficiently.

Mechanical Engineer

Toyota Motor Thailand

07/2010 - 07/2012

Samutprakarn, Thailand

- Executed prototype wire harness modifications and extensive field testing for new vehicle models.
- Applied lean methodologies and continuous improvement (PDCA/Kaizen) to iterate and improve technical designs for production.

PERSONAL PROJECTS

Audio Arena Lab (audioarenalab.com) | Creator & Lead Developer

- Architected a production-grade web platform using Angular and TypeScript to deliver real-time, high-fidelity audio comparisons for audiophiles.
- Engineered complex state management and data visualization to handle concurrent multi-track audio streaming, successfully processing 19 hardware profiles across 12 distinct audio tracks simultaneously without performance degradation.
- Acted as full-stack owner, utilizing lean startup principles to rapidly deploy an MVP, integrate AI tools into the production pipeline, and scale the application infrastructure

ConvertRai application (iOS/Android)

- Built a rapid MVP utility application for iOS/Android focusing on high-performance real-time conversions and local storage management.

EDUCATION

Master of Science: Engineering Design

Loughborough University

08/2008 - 08/2009

United Kingdom

Bachelor of Engineer: Mechanical Engineer

Sirindhorn International Institute of Technology (SIIT), Thammasat University

2004 - 2007

Thailand

CERTIFICATES

IBM RAG and Agentic AI Professional Certificate

IBM. via Coursera.org

Neural Network and Deep Learning

Stanford University. via Coursera.org

Product Management: Building AI-Powered Product

by Skillup via Coursera.org

Machine Learning

Stanford University. via Coursera.org

Generative AI: Prompt Engineering

by IBM. via Coursera.org

UI/UX Design Specialization

California Institute of Arts. via Coursera.org

ACHIEVEMENTS

Full 4 years scholarship at SIIT

Rewarded as a top score entrance exams candidate and must maintain GPA during study years.

LANGUAGES

Thai

Native Language

English (895 TOEIC score)

Full Professional Proficiency
